

This tested item will remain in the global database for future status changes, monitoring and legal evidentiary reporting.

GBIC Operational and Electronic Verification Failure Report

Product Number: GLC-LH-SM

Description: GE SFP, LC connector LX/LH transceiver

The industry-standard Cisco® Gigabit Interface Converter (GBIC) is a hot-swappable input/output device that plugs into a Gigabit Ethernet port or slot, linking the port with the network. Cisco GBICs can be interchanged on a wide variety of Cisco products and can be intermixed in combinations of 1000BASE-T, 1000BASE-SX, 1000BASE-LX/LH, 1000BASE-ZX, 1000BASE-CWDM, or 1000BASE-DWDM interfaces on a port-by-port basis.

Vendor/Mfr. Name: CISCO-FINISAR

Date Manufactured: 7/16/2010

Vendor Part Number: FTRJ1319P1BNL-CS

Revision: A0

Type of Connector: LC

Serial Number: FNS1307X083

Type Identifier: SFP **Mod. Def. Ext. Id.:** SFP Function defined by Serial ID

Transceiver Compliance: 1000BASE-LX **Serial Encoding Algorithm:** 8B/10B

Link Length: SM=10 Kilometers / SM=10000 Meters / OM1=550 Meters / OM2=550 Meters /

Test 1:	PASSED	Test 6:	PASSED	Test 11:	PASSED
Test 2:	PASSED	Test 7:	PASSED	Test 12:	FAILED
Test 3:	PASSED	Test 8:	PASSED	Test 13:	FAILED
Test 4:	PASSED	Test 9:	PASSED	Test 14:	PASSED
Test 5:	PASSED	Test 10:	PASSED	Test 15:	FAILED

- Device failed one or more VST-Assurance(TM) Service electronic or comparison verification tests.
- IDS Sync Failure (TE 11/14/12)
- Label of poor quality
- Label markings, lines or type of poor quality
- Latch incorrect type or color
- Logo of poor quality
- Serial does not scan with leading S on outside of package
- Version number incorrect

OUI Verification Via IEEE Registry:

Here are the results of your search through the public section of the IEEE Standards OUI database report for **00-90-65**:

```
00-90-65 (hex)          FINISAR CORPORATION
009065 (base 16)       FINISAR CORPORATION
                        1389 Moffett Park Dr
                        Sunnyvale CA 94089
                        UNITED STATES
```

Your attention is called to the fact that the firms and numbers listed may not always be obvious in product implementation. Some manufacturers subcontract component manufacture and others include registered firms' OUIs in their products.

All entered information is treated confidentially on a per account basis. However, it may be communicated to authorities upon judicial order, search warrant, or as part of an evidentiary legal process or investigation. Individual product test data is used to do summary test 'Verification' of product assurance throughout the channel supply process and is reported as a PASSED or FAILED VST-Assurance test condition with a high level description upon a failed test. The verification tester is identified on reports by their VST account number and initials. Verification, failure, and summary reports are provided by the Verification Systems Technology's Verification Systems Technology's Assurance (VST-Assurance) Service application. All Part Numbers, Serial Numbers, Revisions, Vendor/Mfr. Name, Date Manufactured, Vendor OUI Codes and more are read from capture reports run directly on the device. The capture reports are analyzed and then recorded during the Operational Verification Test. Depending on the manufacturer, some tests are specified by the manufacturer of the device and maybe unique and specific to the product's manufacturer. The OUI Verification is a referenced focused screen capture of IEEE OUI Verification on the IEEE public web site. Note: The duplicates (serial numbers and more) test is compared against all other tested units within this global verification system. The PE Match (Physical/Electronic) and its failure description are part of a comparison test performed by the Tester between the electrically read information and the physical information on the device. VST is continually improving and adding new tests to the overall test environment and on a specific equipment vendor basis. Test Enhancements (TEs) are applied at the time of the test. © 2013 Verification Systems Technology, LLC. All Rights Reserved
